
PETER MOORE, Ph.D.

Peter Moore is Director of Process Development and Fast Trak Services at Amersham Biosciences Inc. formerly Pharmacia Biotech Inc. He holds a Ph.D. in Microbial Biochemistry from the University of Nottingham, England, and after spells as a Post Doctoral Fellow in the Biochemistry Department and the Cancer Institute at the University of Alberta, Canada, joined the Fine Chemicals Department of Pharmacia Inc as an NRC Industrial Post Doctoral Fellow. During his 24 years at Amersham Biosciences, Dr Moore has held numerous positions within the organization ranging from R&D to process development to sales and marketing. His main area of expertise is in downstream process development and purification of biomolecules. Dr Moore teaches courses regularly in Asia and North America and he is an adjunct professor at Penn State University, M.I.T., Utah State University and the University of Waikato (New Zealand) where he teaches a number of downstream courses in their respective Biotechnology Centers.
